

Will some crooner or per cent money lender who thrives on the ready circulating money of a mining camp, a who is everlastingly cautioning people to beware of "wildcat" mines, have the good grace to define the term. Let him do so and every condition he applies will be met by producing a great mine with

While the program was not a very long one or varied, the quality made up for all these deficiencies. There were songs by Mrs. Pitts, recitations by the Rev. Mr. and Mrs. Evans, piano selections by Mrs. Kimpton, Mrs. Evans and Miss Hart. All those in attendance expressed themselves as delighted with the entertainment.

J. W. McNaught in South Africa

(Continued from Page 3.)

An old Boer told me that he had fought all through the war, but he had quit as there was nothing left to fight for, he had given up his arms and taken oath. I was picketed near his house one day when we were acting as an escort to the transport getting supplies from the train about eight miles from our camp, where the Boers had stepped in and blown up a bridge one night and cut our line of supply, the trains having got through as far as this point before, but it didn't take them long in getting the track in repair.

I have seen quite a lot of this country now and what I have seen of it convinces me that it is one of the finest countries under the sun for a white man to live in, and how it has been left so long in the hands of the Kaffirs undeveloped and so easy to develop baffles me. Zulu land is just a lovely place, fertile soil, nice climate and grows anything. All through Natal anything and everything will grow that is cultivated, and what a fine place to rear cattle. They run out all the year round and still they have to import the most of their provisions, such as hams, bacon and butter. What a fine opening for some progressive farmer, as black labor is so cheap. I expect to see a big lot of the soldiers that are now out here staying in the country—Australians and Canadians as well. I have just about made up my mind to stay here for another year and see what it will do. The Transvaal is very much like Manitoba even to the rich black soil, only in places such as where we are just now, there are a lot of high kopjes or hills. Some are very rocky and stoney, others are good grazing, but take it all in all it should be the granary of South Africa, instead of what it is, occupied by a lot of lazy Dutchmen, owning about 10,000 or 12,000 acres of land, with a little shack, like a halfbreed place on it for a home and having a few sheep and cattle and a few acres under cultivation to grow mealies or corn. That is about all they have done after 40 or 50 years residence on it, and I expect that if the new government acts very liberally towards its immigrants that it will boom, as it is so rich in minerals, coal, iron, tin and copper being found as well as gold. It is bound to have a great future. I would not be surprised to see quite a few towns as large as Johannesburg spring up here in the next few years. This is about the middle of their winter and it is just like Manitoba's fall weather—the days nice and warm, the nights cold and frosty. I have seen as much as half a mile of ice on the water in one night—a little too cold to be out with only one pair of blankets and light cotton underclothes. Our clothes are getting pretty well played out. What we want is some heavy woollen underclothes to keep us warm at night. Our food is not so bad, not much reason to complain. We are allowed one pound tinned or one and one-quarter pounds fresh meat, one peck biscuit, one-quarter pound jam and fresh vegetables or potatoes and onions when they can be got, which is not often, but now that the rains are coming we expect to get some often. Have just come off outlying picket, that is doing sentry about one-half mile from the camp, all right (that is one of the worst jobs that we get).
